

The core focus of NatUR-W is nature-based solutions. By leveraging green infrastructure and ecosystem services, the project addresses: energy poverty, water scarcity, urban decay and the risk of social fragmentation.

## Key Actions for Mantova

- 1 Resilient solutions to tackle climate change
- 2 Technical capacity building
- 3 Stakeholder engagement and participation

### Benefits:

**Sustainable water management:** Reusing rainwater and reducing water consumption, enhancing resilience to floods and droughts.

**Climate adaptation:** NBS and innovative solutions to face climate change effects.

**Social impact:** Improved cohesion and revitalization of public spaces, offering new educational and cultural opportunities.

**Energy efficiency:** Reduced heating and cooling demand in built environments.

The NatUR-W strategy, provides a replicable model for cities seeking sustainability, inclusion, and innovation in urban areas.
